

Call for Nomination

IEEE MTT-S and AP-S Inter-Society Distinguished Lecturer

In 2023, the IEEE Microwave Theory and Technology Society (MTT-S) teamed up with the IEEE Antennas and Propagation Society (AP-S) in having successfully launched the Inter-Society Distinguished Lecturer (ISDL) program. In 2024, the MTT-S and AP-S will continue this partnership and further substantiate this program, with the aim to strengthen and increase the bilateral collaboration and professional synergy between the two societies. It will create cross-sectorial and multidisciplinary distinguished lectures in the fields of mutual and common interest to MTT-S and AP-S, based on an agreed cost-sharing scheme. It is expected that this ISDL program will serve joint communities and chapters of the two societies around the globe.

In this 2024 second call, the two societies will jointly select and appoint one or two Inter-Society Distinguished Lecturers for the duration of three years.

The ISDL joint selection committee of MTT-S and AP-S is searching for candidates who are internationally recognized experts and technical leaders in the technologies bridging both societies, as well as excellent speakers to broad audiences.

Self-nominations are welcome and encouraged. The ISDL candidates can also be nominated by MTT-S/AP-S Technical Committee Chairs, AdCom Members and Chapter Chairs.

A nominated candidate should be a member of both societies and must not have been a DML or AP-S DL in the previous ten years. They should also agree to deliver a minimum of three distinguished lecturing tours each year during the tenure of three years, if selected.

The required nomination documents should include:

- Title and abstract of the talk, and
- One-page biography and affiliation (including region and country) of the candidate.

The nomination documents should be sent to: **Luca PIERANTONI** (l.pierantoni@univpm.it) and **Levent SEVGI** (lsevgi58@gmail.com, lsevgi@ieee.org)

The nomination deadline is **April 15, 2024**.
